SCIDEV LIMITED (ASX: SDV) CONTRACT ANNOUNCEMENT | 28 OCTOBER 2026

SciDev wins three MaxiFlox chemistry contracts worth about $8 million

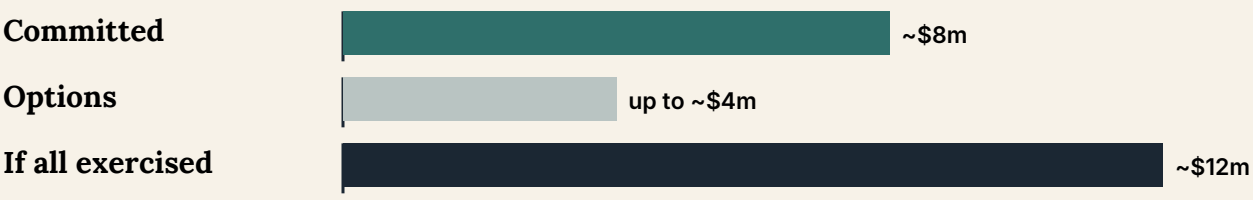

SciDev says the three contracts have a total committed value of about $8 million, with extension options worth up to about $4 million more. The company expects about $5 million of revenue from them in FY27, of which about $3 million is incremental to FY26.

~$8m
Committed value
Three contracts, 1 to 3 year terms

~$12m
If all options exercised
Options at customer discretion

~$5m
FY27 revenue expected
About $3m incremental to FY26

COMMITTED VALUE VERSUS OPTIONS ($ MILLION)

THE THREE CONTRACTS

1 **Hunter Valley coal mine (NSW)**
Two-year contract. The customer is confidential at its request.

2 **Major municipal water and wastewater provider**
Initial three-year term with extension options.

3 **Developer of a large national infrastructure project**
Up to 18 months.

WHAT THE COMPANY DOES

SciDev is an ASX-listed water treatment technology company. MaxiFlox is its chemistry product line. The company says all three contracts followed a competitive tender.

THE

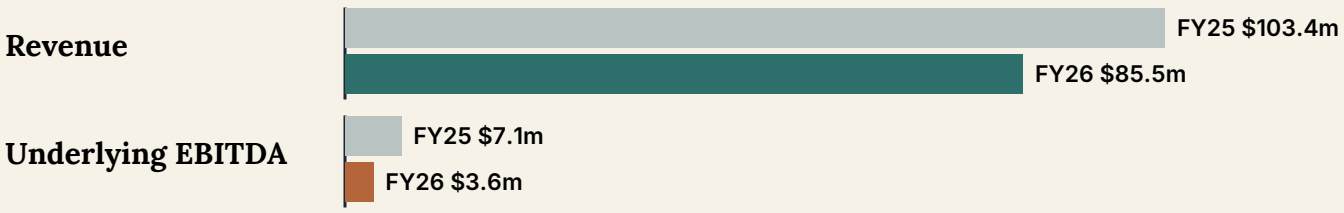

ANNOUNCEMENT ROOM

WHAT HAPPENED. WHY IT MATTERS. WHAT COMES NEXT.

Why it matters: a small win against a big base

The contracts add chemistry revenue. But the expected $5 million in FY27 is small next to a business that earned $85.5 million in FY26.

FY26 CONTEXT, REPORTED 27 AUGUST 2026 ($ MILLION)

REPORTED

FY26 revenue of $85.5m fell 17% from $103.4m. Underlying EBITDA was $3.6m, down 49% from $7.1m. Net cash was $6.8m at 30 June 2026 versus $6.3m. Recurring revenue was 38% of the total versus 30%.

TAR CALCULATION

The expected $5m of FY27 revenue equals about 5.8% of FY26 group revenue and about 18% of FY26 Process Chemistry revenue of $27.3m. These compare an FY27 expectation with FY26 actuals.

BUILDING BLOCKS

About $14m of new chemistry contracts in calendar 2026
SciDev counts today's ~$8m plus the ~$6m Newmont contract (three years plus a one-year option, about $2.0m a year) won in June.

Data centre services added
SciDev's first data centre contracts, announced 5 August, cover design, consulting and engineering services and are expected to add about $0.5m of revenue in 1H FY27. The contract value is not disclosed.

New leadership
Todd Scott became CEO on 26 May 2026, with John Gardiner as interim CFO.

WHAT TO WATCH

Delivery against the $5m FY27 expectation
Revenue timing is the company's estimate, not a result.

Option exercises
The extra ~$4m depends on customers choosing to extend.

Rum Jungle completion
The company expects the project to finish in the first half of FY27, which will matter for the revenue base.

TAR TAKE

A tendered, multi-sector win is a good sign for the chemistry business, and recurring revenue rose to 38% of FY26 revenue from 30%. But $5m of expected FY27 revenue does not offset a year in which revenue and underlying EBITDA both fell. The $12m figure is a ceiling that depends on option exercises. What matters is conversion into revenue and margin. The company has not disclosed contract margins.
